Integrates with	Sage 300 ERP
Module	Accounts Receivable, Bank Service
Component Version Compatibility	6.0, 2012, 2014
Database Compatibility	MS SQL Server, Pervasive SQL
Description	Deposit Connector is a great tool for any company who either uses their bank's remote deposit capture program or uses lockbox services at their bank to collect checks. Both of these are great services provided by banks, but users still have to manually key in the bank deposit transactions to their accounting system. Deposit Connect from CodePartners helps you create bank deposit transactions based on the downloaded file from the bank's remote deposit system or the lock box service. Currently, the program is set up for one bank file, but it serves as a great framework if you need to change to a different bank file format.
