## **CodePartners to Exhibit and Present at Sage Accpac ERP Customer Conferences**

*CodePartners connects with customers at events in California and Burnaby, B.C.*

**Dallas, TX – October 2, 2009** – CodePartners, a software development firm, is pleased to be a part of two upcoming customer conferences in October. Arxis Technology’s Connections conference is October 15 and Plus Computer Solutions’ conference is October 20.

Both conferences are always well attended and provide an opportunity for Sage Accpac ERP users to spend a day sharing, networking, and learning. At each event, CodePartners will have the opportunity to meet representatives from companies that rely on Sage Accpac ERP to run their businesses and share with them productivity-enhancing products available.

Additionally, Brian Terrell, founder of CodePartners will present a break-out session at each conference. As a Gold-Level Sponsor at Plus’ conference, the presentation is entitled: Be Innovative with Sage Accpac ERP. At Arxis’ event, the presentation is entitled: Tips, Tricks, and a Sneak Preview of Version 5.6.

CodePartners will feature a few of their most popular products, including Employee Number Change and National Account Change. The Employee Number Change product allows the change of an existing employee number to a new employee number across the system. The process is quick and works with U.S. and Canadian Payroll. The National Account Change product allows the user to change or assign national accounts for all selected customers, even if a customer has an open invoice. Batch processing enables multiple customer records simultaneously.

“We appreciate the opportunity to be a part of both of these events,” said Brian. “Both Arxis and Plus do a terrific job hosting these conferences, and we are honored to continue being invited back. “
