Integration from CodePartners Saved One of DataQuest's Largest Clients

Dallas, TX – May 7, 2010 – DataQuest (www.dquest.com), a reseller of Sage Accpac ERP, recently relied on the experience and success record of CodePartners (www.codepartners.com), a Dallas-based firm specializing in software development and business process automation, to save a major project.

DataQuest's client, a parts supplier, was in jeopardy of losing a multimillion dollar contract with a waste management company if they failed to integrate their business management solution with the waste management company's supply chain management system.

Based on the positive results achieved when working with CodePartners on smaller projects, DataQuest engaged CodePartners to develop an integration between the systems. By the time CodePartners was engaged, there were only two weeks before the deadline. "We were in a do or die situation," explained Mark Binkley, Owner of DataQuest, "but CodePartners expedited their work and saved the project."

The project was so successful that the owners of the waste management company incorporated the integration into other parts of the business.

"We were up for the challenge, and we were happy we could help DataQuest and their client achieve a positive result," said Bin Feng, President of CodePartners.

The products involved in this project were Sage Accpac ERP, Iciniti Web Store, Ariba Supply Chain Management, and a CodePartners EDI translator.
